

2017 Heartworm and Flea/Tick Recommendations

Because we know it can be overwhelming to make a decision on what product is right for your pet, we have made this chart of what products we are recommending this year. Our staff will be happy to discuss which product will be right for your pet.

Cats

Revolution (topical) – our #1 choice for flea, heartworm, and parasite prevention in cats

Cheristin (topical) – flea prevention

Capstar (oral) – flea-only - works for 24 hours - good to give if there is a heavy flea burden and then go with another long-acting flea prevention to follow up for best results

Dogs

Heartgard Plus (oral) – heartworm, intestinal parasites – rounds/hooks

NexGard (oral) – flea/tick prevention – not for pets that have seizures

Proheart 6 (injectable) – 6 months of heartworm prevention in 1 easy injection

Revolution (topical) – heartworm, flea -good for pets with food allergies

Trifexis (oral) – heartworm, flea, intestinal parasites – rounds/hooks/whips – not for pets with seizures

Frontline Gold (topical) – flea/tick – use with caution on dogs that live with cats

Capstar (oral) – flea-only – works for 24 hours – good to give if there is a heavy flea burden and then go with another long-acting flea prevention to follow up for best results
